Abstract

PROBLEM TO BE SOLVED: To provide an ink jet recording sheet having superior light fastness of a recorded image, particularly superior light fastness of a magenta image, and also superior characteristics such as recording density and recording quality.

SOLUTION: At least one kind of compounds like N-2-[3-(benzotriazole-2-yl)-4- hydroxyphenyl propionyl amino] ethyl-N,N,N-trimethyl ammonium chloride and others by a general formula 1 is contained in an ink jet recording sheet for forming a recorded image by using aqueous ink. In the formula, R1 , R2 and R3 respectively represent hydrogen atom, C1 -C4 alkyl or C1 -C4 hydroxyalkyl and X represents organic or inorganic anion. (n) represents 0.1 or 2 and (m) represents an interger of 2-6.
